

MPO MicroCable Trunk Assembly

MPO MicroCable Trunks facilitate rapid deployment of high-density backbone cabling in data centers or other high fiber density environments reducing network installation or reconfiguration time and cost. They are used to interconnect cassettes, panels or ruggedised MPO Fan Outs, spanning MDA, HDA and EDA zones. These are offered in all fiber types as standard 12 to 144 core versions using a compact and rugged MicroCable structure. The compact cables optimize cable-way use and improve airflow. MPO low loss Premium versions are offered featuring low insertion loss for demanding high-speed networks where power budgets are critical.
